

KANCHERLA AJAY

SOC Analyst | SIEM Monitoring | Threat Detection

+91-8688481801 • ajaysunny2708@gmail.com • Bangalore, Karnataka

SUMMARY

Cybersecurity Analyst with hands-on experience in SOC operations, full cycle incident response, and proactive threat hunting. Proficient in SIEM platforms (Splunk, QRadar, Wazuh), NGAV/XDR/EDR monitoring, endpoint security, and network security. Skilled in log analysis, security process automation using Python, email gateway analysis, and phishing investigation. Built AI-powered SOC automation tools and active cybersecurity home lab. Holds CompTIA Security+ (SY0-701) and CNSP; CEH in progress. Available for immediate joining including rotational/night shifts.

CERTIFICATIONS

CEH – In Progress (Hacker School) | CompTIA Security+ SY0-701 | CNSP – The SecOps Group | CCEP – Red Team Leaders | EC-Council – Dark Web & Anonymity

TECHNICAL SKILLS

SOC & Monitoring: SIEM (Splunk / Wazuh), EDR/XDR Monitoring, Log Analysis, Alert Triage, Incident Response, MITRE ATT&CK Mapping, Email Security & Phishing Analysis

Vulnerability & Testing: OWASP Top 10, Vulnerability Assessment, Penetration Testing, Patch Management

Network Security: TCP/IP, DNS, HTTP/HTTPS, OSI Model, IDS/IPS, Firewall Policy Management, Subnetting

Security Controls: ISO 27001, ITIL Concepts, Active Directory, Antivirus

Tools: Nmap, Wireshark, Burp Suite, Nikto, Nessus, Metasploit, Nuclei

Threat Knowledge: Phishing, Malware, Ransomware, Brute Force Attacks

In SOC & Monitoring: Wazuh, ELK Stack, TheHive, Sigma Rules, OSINT, Threat Hunting

INTERNSHIP

Cybersecurity Intern | Codec Technologies Pvt. Ltd., Bangalore | Jan 2026 – Mar 2026

- Monitored and triaged security alerts using SIEM (Splunk/Wazuh) dashboards and EDR tools
- Analyzed network and endpoint logs to detect suspicious activity and anomalies
- Investigated security alerts and escalated confirmed incidents to senior analysts
- Performed vulnerability scanning using Nmap and Nessus and documented findings
- Assisted in automating basic security reporting tasks using Python scripting

PROJECTS

AI-Powered SOC Triage Lab

- Built an AI-powered SOC home lab integrating Wazuh SIEM with local LLM (Ollama) to automatically triage alerts and map to MITRE ATT&CK techniques
- Automated threat enrichment using OSINT and created incident cases in TheHive eliminating manual L1 triage effort
- Implemented Sigma Rules and ELK Stack for detection engineering and real-time security event monitoring

AI-Powered Vulnerability Analysis Tool

- Engineered a Python-based tool to analyze Nmap scan results, classify vulnerabilities by severity, and generate structured remediation reports
- Integrated threat scoring logic to prioritize vulnerabilities, reducing manual triage effort and improving analyst response efficiency

EDUCATION

BCA – Bachelor of Computer Applications | SEA College of Commerce, Science and Arts, Bangalore | 2022–2025

Class XII – Narayana Junior College, Nellore, Andhra Pradesh | 2018–2020

Class X (SSC) – Sri Sai Vikas High School, Chitvel, Andhra Pradesh | 2017–2018
